

6.0 Bio-Containment

Catalog # 48962 unit with # 48705 cages

Our Bio-Containment units are a rugged design, with quality components and workmanship. This BSL-2/3 arrangement will allow for facility air handling equipment to be connected to the rear of cages. A locking over-center latch system provides a positive seal compression on the front door. The SS Filter Frames provide seal compression against cages. The chambers will provide easy introduction and removal of individual Animal Caging of various sizes and square footage.
