

# General Test Apparatus

## Catalog # 32080

The Test Apparatus is constructed of Stainless Steel, Aluminum, Lexan and UHMW materials.

The holding cage is constructed of Stainless Steel, and is mounted on an integral caster base, and has a window with horizontal bars for the animal to view the objects in the test apparatus.

The holding cage is attached to the Test Apparatus with two latches.

The doors on the Test Apparatus are constructed of UHMW, and clear Lexan Materials.

The test doors are raised and lowered using a system of pulleys on a Stainless Steel cable.
