

# Quad Cage

## Catalog # 32161

This integrated cage and rack system is designed for infant primates and other small animals. The unit is manufactured from Stainless Steel and has four individual cages. Each cage has approximately 2.8 square feet of floor area and can be paired horizontally with the adjoining cage by removing the divider through the front.

3/4" x 3/4" Stainless Steel wire mesh on front door, sides and top. This provides light and visibility.

Each cage has an individual waste pan. Lockable latches secure the waste pans into position.

A push-pull handle is located at a convenient height at the right side of the integrated rack.

Primate units have bolt in perches.

Thermal neutral floor grates and perches can be installed for Old World primates and other small animals.
