

# Ferret Cages

## Catalog # 42824

Designed for enrichment and socialization purposes, the ferret enrichment cage offers several perches and ramps for the animal's enjoyment. Perches are made of a thermal neutral plastic material; ramps are made of wire mesh. Cage frame is constructed of 1-1/2" stainless steel square tubing with all walls made of wire panels. 5" casters support the cage and provide a simple means of transportation. To promote socialization the cage has four individual housing compartments separated by removable center dividers and mid section cartridges. Removable dividers and mid section allow both horizontal and vertical pairing of the four compartments. Each compartment also has a hinged main door that securely latches from the outside.

Overall dimensions: 30" wide x 55" long x 76" tall

Approximately 6 sq. ft. per compartment

All #304 stainless steel construction

Mid section waste pan removable for vertical pairing

Handles for simple maneuvering

Bead blasted to a matte finish
